سَلَم النقاط: (عربية/ 5/2، فرنسية 5/2، / إنجليزية 5/1) الضارب: 2

Epreuve : Anglais

The text

1. Technological development and the internet have changed people's lives on different scales including for instance teaching and learning. The web has become one of the channels of learning that opens the door for people around the world to access education for free, or for fewer costs.
2. The IT booming and the internet have opened the door to largely access knowledge, high quality education and training. This easy access using information systems and the web can improve people's skills for fewer costs. Knowledge delivering to some people would have never been possible without the opportunities offered by technology and the web.
3. A recently published study has highlighted the importance and effectiveness of e-learning and how students are satisfied with web-enhanced teaching. For teachers and instructors, they can learn from this study that the web-enhanced teaching "is no longer an add-on feature in teaching but a necessity" as stated in the research. What can still be missing in online learning and teaching is the interactivity and communication offered in class-based lessons. As stated in the study "undergraduates who are more likely to rely on interactive learning may suffer from web-based teaching that often lacks interactive communications."
4. Today, the use of web to teach and learn is inevitable for both teachers and students. Online courses are becoming more and more necessary for education and for knowledge spread. Thus, teachers should consider this trend in education and get prepared technically and pedagogically to take online teaching in consideration. In turn, students need to get enough skills that will help them effectively benefit from the advantages e-learning is providing.
5. Today, e-learning is adopted not only by students, but also by organizations that want to offer training for their employees. E-learning is a priority for businesses that look forward to improve employee's skills and the economic benefits they can generate from that. That's why online learning has become an important factor for both, education and business.

I/ Reading comprehension: (2marks)

1/ Tick the right option. (0.25 Mark)

The text is mainly about:

- a/ The differences between e-learning and class-based learning.
- b/ The importance of e-learning in people's lives.

Do you think the businesses' decision to adopt e-learning is wise?

I think that

because.....

II/ Language: (2marks)

1/ Fill in the blanks with 4 words from the box. (0.25x4=1mark)

follow / friendly / bills / increasing / think / importantly

Transport is an essential part of modern life, but we cannot ignore its environmental consequences. There's anpublic concern for the protection of our environment, motor manufacturers are devoting more time, effort and resources to the development of environmentally friendly vehicles, but you as a driver can also help.

If youthe principles of ecosafe driving not only will you become a more environmentally friendly driver but your journeys will be more comfortable, you could considerably reduce your fuelas well as reducing those emissions that cause damage to the atmosphere.

More you will become a safer driver as you develop your planning, perception and anticipation skills to a higher level.

Task 2

Put the bracketed words in the right tense or form. (0.25x4=1mark)

It is no small thing that technology has brought the world closer. People sitting in the **[remote]**corner of the earth are able to communicate with each other with a speed that was unthinkable till a few years back.

However, there is a flipside to it. Technology has made our relationship **[total]** impersonal. We are getting distant. Now, instead of greeting and embracing somebody, we send an email, or an e-card or even an SMS. And the job is done. Where is that warmth of a hug or the few words of love and affection spoken face to face or over the phone?

For almost all users, these gadgets **[become]**..... an addiction. People clutching a cellphone in the palm or communicating through earpieces while walking or travelling is a common sight. Even at night, the inseparable cellphones rest by the side of the user's pillow. People keep clicking it most of the time, giving no respite to the poor little thing. In fact, they become restless if it **[not / ring]** for a brief period.
